

# GWINNETT SENIOR GOLDEN GAMES

## Dominoes

1. 2, 3 or 4 players
2. Place all dominoes face down and shuffle.
3. Players draw one domino to determine who goes first.
4. Player drawing highest double plays first. If no doubles are drawn, player with highest domino plays first
5. Place all dominoes in on the table and re-shuffle.
6. Each player draws 7.
7. Remaining dominoes remain face down to be drawn if a player is unable to play from his hand.
8. Begin play-per rule 4 –player may select any domino to begin play.
9. Object of the game: Scoring points by laying the dominoes end to end (the touching ends must match, i.e., one's touch one's, two's touch two's, etc.). If the dots on the exposed ends total any multiple of five the player is awarded that number of points. All sides of the first double (the spinner) may be used one piece to each side and later one to each end. All other doubles are played at right angles to the line and the total points on both ends are counted. Dominoing occurs when one player goes out by playing all his dominoes. The sum of the spots of all opposing players is computed and added to the dominoing player's score (rounded to the nearest five). In partnership play the spots of the partner of the one who "DOMINOED" are not counted.

10. If in the course of the game, it becomes impossible to move the player with the least amount of dots wins the games and earns the total dots of the other players
11. Dominoes are shuffled and another game begins.
12. First player to 250 wins the competition.
